I write this concerning the NAB's stance on XM radio. I am a professional driver and XM's services are invaluable to my industry. As a consumer and a subscriber to XM the additions that they have made for myself as well as the listening public are overwwhelming. The traffic and weather reports are second to none, and are a great service that they offer to us. Having up to date reports allow me to schedule my runs according to the conditions that are occuring. It also allows us in the trucking industry to drive another mile as safely as we can because we know what we will be incountering. I am firmly against the NAB's petiton 04-160. I aslo hope that XM continues to offer great programming for all that subscribe to its services.

Thanks

Jason C. Sivertsen
